

Poly-Char 2026  
(Smart, Sustainable & Data-Driven Polymeric Materials:  
From Molecular Design to Circular Applications)  
November 22-25, 2026 @Chiang Mai, Thailand

## Invited Speakers

### Scott Grayson

Tulane University, USA

**Scott M. Grayson** completed his PhD in Chemistry from the University of California, Berkeley and carried out his post-doctoral studies at the University of Texas. He was appointed as a professor at the Department of Chemistry at Tulane University in New Orleans, Louisiana, USA in 2005. He now holds the Joseph H. Boyer Professorship of Chemistry at

Tulane where he explores the synthesis and applications of well-defined, yet complex macromolecular structures. His research group has focused on the synthesis of amphiphilic and cyclic polymers for applications including transdermal drug delivery and gene therapies but also focuses on new techniques for polymer characterization.
