

Poly-Char 2026
(Smart, Sustainable & Data-Driven Polymeric Materials:
From Molecular Design to Circular Applications)
November 22-25, 2026 @Chiang Mai, Thailand

Invited Speakers

Soo-Hyung Choi

Hongik University, South Korea

Soo-Hyung Choi received his Ph. D. from the University of Minnesota, Twin Cities in 2010. He then conducted postdoctoral research at the University of California, Santa Barbara until 2012. Since 2012, he has been a professor in the Department of Chemical Engineering at Hongik University. His research

focuses on the structure and dynamics of nanostructured soft materials, including block copolymers, and on developing a fundamental understanding of dynamic associative interactions in aqueous media. He is also interested in the facile aqueous processing of polyelectrolyte complexes. Dr. Choi has received the Transport Phenomena Young Researcher Award from the Korean Institute of Chemical Engineering and the Early Career Award by the Korean Society of Rheology. He currently serves as an Associate Editor of the Korean Journal of Chemical Engineering.
