

Poly-Char 2026
(Smart, Sustainable & Data-Driven Polymeric Materials:
From Molecular Design to Circular Applications)
November 22-25, 2026 @Chiang Mai, Thailand

Invited Speakers

Xia Dong

Institute of Chemistry Chinese Academy of Sciences, China

Xia Dong received her PhD degree from the Donghua University in 2001. She has been engaged in basic research on the structure and properties relationship, processing, and modification of polyolefin and polyamides, especially focusing on the key scientific issues in the polymerization, processing, and application technology of long chain polyamide and its copolymers. More than 240

papers and 1 book have been published, and 58 patents have been authorized.
