

Poly-Char 2026
(Smart, Sustainable & Data-Driven Polymeric Materials:
From Molecular Design to Circular Applications)
November 22-25, 2026 @Chiang Mai, Thailand

Plenary Speakers

Eugene Chen

Colorado State University, Colorado, United States

Chen Eugene received his undergraduate education in China and Ph.D. degree from The University of Massachusetts - Amherst, United States. After a postdoctoral stint at Northwestern University, he joined The Dow Chemical Company, where he was promoted from Sr. Research Chemist to Project Leader. After two and a half years at Dow he moved to Colorado

State University, where he currently is a University Distinguished Professor, the John K. Stille Endowed Chair Professor in Chemistry, and the Millennial Professor of Polymer Science and Sustainability. His research is centered on polymer science, sustainable chemistry, and molecular catalysis.
