## Yi-Ting Lai

Ming Chi University of Technology, Taiwan

**Yi-Ting Lai** is an Assistant Professor in the Department of Materials Engineering at Ming Chi University of Technology, Taiwan. His research focuses on advanced functional materials, electrochemical technologies, environmental remediation, and resource recovery for sustainable development. He has published numerous peer-reviewed articles in leading international journals and holds several patents related to water treatment and resource recovery technologies. His research has received support from government agencies and industrial partners, particularly in the semiconductor, environmental, and advanced manufacturing sectors.
